

MNGEO21 Geographical Approaches of Regional Development

Language of instruction:	English
Form of teaching:	Practice
Class hours per week:	2 P
Credits (ECTS):	4
Course description:	<p>This course aims to provide an understanding of the geographical and spatial basis of regional development and even provides an insight of different theoretical spatial approaches. It will give some international examples of geographical approaches of regional development. On successful completion of this course students are expected to have an understanding of the different geographical approaches used in regional development both from a theoretical/historical and a geographical/spatial point of view. By the end of term, students are expected to be able to compare different approaches to regional development; understand the underlying spatial theories.</p>
Assessment methods:	Written test
Teaching period:	Fall semester
